COMMUNITY FORUM

Be part of the answer! An interactive session to create a local submission to the provincial government in their development of an affordable housing strategy.

Discussion Questions:

What specific roles should each of the housing partners play in the delivery of affordable housing?

What changes are needed to our housing programs to better use resources and improve access to affordable housing? Changes could include modifications to the Affordable Housing Program or the simplification of housing and homelessness programs.

What changes are required to the Social Housing Reform Act, 2000 to reduce the regulatory burden and improve the management of social housing?

What creative new ideas could improve the current housing system? This could include new planning tools, innovative financial options and new green technologies.

What should be used as the housing indicator for Ontario's Poverty Reduction Strategy? In this context, what do terms like affordable, adequate and suitable housing mean to you?
